

Asset Beacon [Gen2]

Our Asset Beacon has been designed to provide you with real-time asset intelligence in your facility. When your asset is tagged, a unique and anonymous identifier is broadcast along with live telemetry including temperature, humidity, lux and motion data.

A user-triggered audible alarm is also included available to help you to find your asset.

The Asset Beacon is compatible with our indoor and outdoor Detector range, and can be identified by Pathfindr's stand-alone GPS Tracker.

Features

- 3+ years life
- Secure, no identifiable asset data
- Temperature sensor
- Humidity sensor
- Lux sensor
- Audible alarm
- 3 axis motion sensing
- FOD aware design
- Low profile form factor
- Intelligent broadcast frequency
- Coolant and oil resistant
