

Detector [Gen2]

Our Detector is the backbone of the Pathfindr asset intelligence system. Once installed, our Detectors continuously monitor the location and environmental conditions of all nearby assets tagged with Pathfindr Asset Beacons.

This real-time asset data is uploaded the cloud and made available in our online portal and mobile application.

Features

- Indoor asset location monitoring
- Asset motion monitoring
- Asset environmental monitoring
- External BLE sensor support
- Easy installation
- Low power consumption
- Operation LED indicators
- Internationally deployable
- Adjustable scan frequency
- Self-managed configuration
- Easy-to-use web portal
- Companion mobile app
- OTA firmware updates
- Optional outdoor enclosure

Technical Details

- LoRaWAN networking
- 110 - 240v AC power supply
- < 0.5 Watt operation
- Built-in 1 month backup battery
- Small form factor (110x80x30mm)
- Live health monitoring
- IP54 enclosure
- ROHS / CE / FCC
- Assembled in the UK
